

MATTHEW BARONDEAU

(979) 204-6435 ♦ mebarondeau@utexas.edu

<https://matthewbarondeau.github.io/>

EDUCATION

Ph.D. Electrical and Computer Engineering The University of Texas at Austin; Advisor: Andreas Gerstlauer	05/2027
M.S. Electrical and Computer Engineering The University of Texas at Austin; GPA 3.88	12/2022
B.S. Electrical and Computer Engineering The University of Texas at Austin; GPA 3.75	05/2020

WORK EXPERIENCE

The University of Texas at Austin Graduate Research Assistant <ul style="list-style-type: none">Investigated light-weight multithreading microarchitecture for memory-intensive workloadsDeveloped dataset for ML-based proactive management for heterogeneous MPSoCs	08/2020 - Present Austin, TX
Nvidia Resiliency and Safety Architecture Intern <ul style="list-style-type: none">Performed analysis and injected faults to improve data center resiliency and automotive safetyAutomated process to be chip agnostic for future exploration	05/2024 - 08/2024 Santa Clara, CA
Nvidia GPU Architecture Intern <ul style="list-style-type: none">Enhanced the L2 standalone simulator to simulate inter-slice communicationDesigned and optimized a GPU L2 metadata prefetcher	05/2022 - 08/2022 Austin, TX
Tactical Computing Labs Research Engineer I <ul style="list-style-type: none">Quantified the component overhead in SST and developed a performance monitoring toolImplemented locality optimization for accelerator thread migration, leading to a data movement reduction	05/2021 - 08/2021 Austin, TX
Arm CPU Performance Intern <ul style="list-style-type: none">Established a correlation between RTL and performance simulator replacement policy behaviorDetected and rectified bugs related to the eviction process of the cache replacement policy	05/2020 - 08/2020 Austin, TX
Lockheed Martin Missiles & Fire Control Electrical Engineering Intern <ul style="list-style-type: none">Engineered a high-current power supply controllerConducted comprehensive testing and characterization of a fiber communication circuit	06/2019 - 08/2019 Grand Prairie, TX
Applied Research Labs Student Technician <ul style="list-style-type: none">Wrote RTL module to enable DMA playback of GPS data on Xilinx Virtex 7 FPGAReplicated analog front-end attenuation experiment to characterize system noise	05/2018 - 08/2018 Austin, TX

SKILLS

Languages: C/C++, Python, Perl, CUDA, SystemVerilog, Assembly, HTML, CSS

Software: Git, Gem5, SST, Perf, Verilator, Intel PIN, Vivado, LLVM

Topics: Parallel computer architecture, Memory system design, Resilient computing

AWARDS

Texas ECE Graduate Leadership Award	2024
Qualcomm Innovation Fellowship	2023 - 2024
Virginia & Ernest Cockrell Jr. Fellowship in Engineering	2020 - 2024
